

AI Business Brain Architecture

What lives where in Course 1

A Free Frankly AI Resource • Version 1.0

Course 1 architecture

Business knowledge enters one organised workspace. Claude assists inside VS Code. The owner approves important outputs.

What comes later

Later layer	Examples	Not part of Course 1
Connections	Gmail, Calendar, Drive and CRM	No live connections before the guided framework is tested.
Automation	Triggers, schedules and workflow platforms	No unattended sending, spending, deletion or publishing.

Privacy reality

The workspace is stored on your computer, but Claude Code sends relevant prompts (what you type) and context (the file content it is working with) over the internet to Anthropic for processing. Use sanitised demo data.
